Address: airport extension phase 2

Professional Summary

Hi, I'm **Miracle Chukwude**, a web developer with strong skills in front-end design and backend development. I enjoy creating user-friendly interfaces with **HTML**, **CSS**, and **JavaScript**, and I also specialize in building powerful and scalable web applications using **Python** and **Django**.

Over time, I've worked on projects ranging from e-commerce platforms and blog systems to API integrations and custom dashboards. My focus is always on writing clean, efficient code and delivering solutions that solve real problems.

One of my notable projects is **MAXXWALLPAPER.COM**, where I contributed as a backend developer and ensured timely delivery.

When I'm not coding, I like exploring new technologies, improving UI/UX designs, and sharpening my programming skills.

My goal is to keep growing as a developer and build impactful projects that make a difference.
